EOS Consulting S.p.A. specializes in technical advisory services and project management in the renewable energy sector and infrastructure.

EOS Consulting provides technical and financial advisory services in favour of Banks, Insurance Companies, and Private Investors operating in the field of infrastructures, real estate and industry, as well as traditional and renewable energy power plants.

The advisory services offered by the firm include the analysis of technical features related to the design and authorization of the Project, as well as the examination of the contractual package, in order to finally assess its feasibility and/ or bankability.

EOS operates in the European Technical advisory market which is constantly evolving. As a result of the considerable mass of projects realized in the Renewable Energy sector in the last three to four years in Italy, the primary objective for a firm such as EOS Consulting is to find forms of agglomeration and consolidation for the structured players.

The firm has been involved in a number of major projects in this area during this year. EOS has been involved in the realization of more than 80 MW in the U.K., acting as the Project Manager. Furthermore, a primary photovoltaic operator, ranked among the top five global players, has requested EOS to complete an additional 120 MW by March 2016.

The firm was established by founding partners with vast experience in the construction and consultancy sectors and currently operates with around 35 professionals.

Each professional has a multi-year experience in construction, energy and financial markets matured in different locations. This approach has allowed EOS to focus on international markets and to create long term relationships with international partners and to establish new branches in the emerging market.

In the Italian market, under Europe's mutated financial conditions, the firm have been involved in the technical due diligence activities of the principal operations conducted in Italy, acting as a Technical Advisor. Among these operations were the refinancing of a pipeline for more than 200 MW, the emission of a project bond for a pipeline of approximately 100 MW and for the Merging of two primary operators in the Italian sector, finalized at the constitution of a Joint Venture in the photovoltaic sector for a total power greater than 250 MW.

The most important project that EOS have been involved in, and that is currently underway, is concerned with merging the assets of a primary infrastructure fund F2i SGR SpA and a power company of global importance Enel Green Power S.p.A.. The goal is to establish a player with an operating power exceeding 250 MW. It is the first operation of its kind to be conducted in Italy, and its assets are expected to increase over the next few years, and In this days the Juventus Football Club CEO Aldo Mazzia revealed plans for J-Village, 170,000 Mq in Turin who comprehend, new Juventus club headquarters, international school (ISE), J-Hotel and a park of 5,000m², EOS is the a Technical Advisor. It is a perfect example of how EOS operates; working with large companies to achieve colossal goals, but always ensuring that every detail is taken care of.

The firm sees itself as a container, made up of people, talents and skills. It is a container that evolves and grows every day, through the sharing of strategies between the Business Unit and the client, from whom they receive information and to whom they also provide information. This information generates experiences, and the experiences overlap, building day by day the EOS of the future. At EOS they believe that human and professional development are found at the base of everything and strive constantly to ensure that these developments occur throughout the company.

EOS is the key to consenting the optimization of invested public and private resources. Dependability and competence, experience and innovation, pride and dedication to serve their clients are the firm's most outstanding characteristics, which make them a unique player in the market. These characteristics also allow the firm to respond quickly and relevantly to all of their clients' challenges, however challenging they may be.

The future looks set to bring a lot of changes for the firm. The firm is looking to consolidate itself as a reference Technical Advisor for the Renewable Sources and Infrastructures sector in Italy, and an ulterior commitment to international markets. Today, EOS already has four operational headquarters, in Milan and Rome, Italy, in London, the U.K. and in Skopje, Macedonia, which respond to the challenges the market holds for the firm, but there is always room to expand and as the firm grows globally there is the potential for more offices to be added.
